

# ABSTRACT

A spiro compound represented by the following formula (I)

5 wherein  $R^1$  and  $R^2$  are the same or different and each is a hydrogen atom, a chlorine atom and the like,  $n$  is 1, 2 or 3, a bond containing a broken line is a single bond or a double bond,  $A$  is  $-X-(CH_2)_q-N(R^3)(R^4)$ ; a group represented by the following formula (a)

and the like, wherein  $X$  is an oxygen atom or a sulfur atom,  $q$  is 2 or 3,  $R^3$  and  $R^4$  are the same or different and each is a  $C_{1-6}$  alkyl group and the like, or  $R^3$  and  $R^4$  optionally form, together with the adjacent nitrogen atom,  
 15 a piperidine ring and the like optionally substituted by one or two  $C_{1-6}$  alkyl and the like,  $R^5$  is a  $C_{1-6}$  alkyl group and the like,  $R^6$  is a hydrogen atom and the like, and  $r$  and  $t$  are each independently one or two, or a pharmaceutically acceptable acid addition salt thereof.  
 20 The compound is useful as a selective estrogen receptor modulator having a climacteric syndrome-ameliorating effect, and can be expected to be a drug for the prophylaxis and/or treatment of osteoporosis, climacteric syndrome and breast cancer.
